## FACTS AND FANCIES

By Frank Fairborn

### The Result Of Jealousy

The chief weakness in Premier Drury's announcement that the municipalities may carry on the building of Hydro electric radials, if they wish, but that they must do so without the assistance of the Government lies in the fact that the Hydro system to be a success, must be a union of all the municipalities, backed up by the central organization of the Hydro Electric Commission, with all its experts and engineers to assist the municipalities.

If you divide the Hydro Electric scheme in any way, its usefulness is destroyed.

The beauty of the Hydro is that each municipality has the benefit of all the centralized ability in the way of engineers and experts, for practical work.

The reason that the Hydro has been so successful, lies in the fact that all the estimating, all the engineering, all the headwork, has been done by experts, under the fostering care of the Government Commission; and the results given free to the municipalities.

Not only has this been a great source of strength in the system, but many municipalities were brought in to the union through the success that attended neighboring municipalities; and it has been only a rare case where municipalities voted against adopting the Hydro plan, and in nearly every case where this was actually done it was brought about through ulterior motives and unfair, dishonest and antagonistic elements within the municipalities.

The Township of Saltfleet is a fair example of this—most unfair, dishonest and flagrantly deceiving methods were used for the purpose of dividing the Township into factions, and using the one faction to destroy the vote of the other section, in order that the few ringleaders might be enabled to defeat the Hydro scheme.

The peculiar thing about Saltfleet is that the southern section which was, by dishonest means, led to vote against the northern section, soon began, themselves, to clamor for Hydro service, when they found it could be used to the benefit of the farmers.

I am not familiar with the methods used in other municipalities, to defeat the Hydro bylaws, but I dare venture to say if the matter was analyzed that it would be found there was a selfish, antagonistic element at work not for the benefit of the people, but for selfish or ulterior motives.

Up to one year ago the Hydro was on a mere staple footing in the Province of Ontario than the Government itself, because the beauty of it was that the Hydro had gone steadily on prosecuting its good work under several different Governments unchanged and unchangeable—while the Governments themselves, rose and fell according as their acts appealed to the support of the people.

The Drury Government, not being representative of the people in general, but being representative of but one group, has endeavored to make capital for itself by trying to set the cities and towns, and some of the more favored rural municipalities, up against the rural districts by engendering an antagonistic feeling against the cities and towns and their surrounding districts.

This is a very foolish move on the part of the Government, because if the Hydro Electric schemes are carried to the full length of their possibilities, the rural districts will benefit by better transportation, and better light, heat and power, accommodation to almost as great an extent as the cities towns and present Hydro favored rural districts.

I think it has been amply demonstrated in Canada, that an electric railway can run through snowbound country much more easily than a steam railway can.

When an electric railway was first built in this country, the general opinion was that they were all right in favored localities—the Niagara Peninsula for example—where the snowfall was light and where the rigors of winter were less severe than in the more northerly portions of the Province.

Not time has demonstrated that the rigors of winter have less detrimental effect upon electric railways than upon steam railways.

The frost and cold is no disadvantage whatever to an electric railway—the current is never prevented from doing its full power on the coldest day in winter any more than on the mildest day in spring.

Whereas Jack Frost reduces the efficiency of a steam engine by fully fifty per-cent and in snowstorms and snowdrifts, reduces the efficiency of a steam engine seventy-five per-cent and in many cases, one hundred per-cent.

Keep the right of way open and cold wind and snow has no effect on an electric railway—but even with the right of way clear severe frosts, cold winds and snowstorms will reduce the effectiveness of a steam engine at least fifty per-cent.

A steam engine is a bad cut, with a drifting snowstorm, once the right of way becomes even slightly impeded is a useless hulk of iron and steel.

But a good strong electric locomotive is just as powerful, in a drifting snowstorm, or in zero weather, as it is in midsummer.

And I dare venture to say that even in the northern portions of the Province the running of an electric railway in the dead of winter would not be as expensive an operation as the operating of a steam railway would be.

This being the case, it will only be a few years until we see many lines of railways that are now operating at a loss with steam engines, converted into profitable electric railways.

This situation has only begun to dawn on the people of this country, and when we come to a full realization of it, Drury and his one horse ideas will not stand long in the way of progress, and it were better for that gentleman, as a politician, if he would look forward, and assist in the Hydro schemes, rather than, by looking backward, try to injure this progressive movement.

His ideas that "the municipalities may go ahead and build Hydro Electric radials if they wish, but must do so without the assistance of the Province" sounds like nonsense to me, on account of the fact that the municipalities have no machinery to go ahead and build railways with; estimating on railways, engineering work on the railways—or in fact anything else in connection with the railway scheme, without the support of the Provincial Hydro Systems group of engineers and experts.

It may be possible that the Premier in withdrawing the support of the Province from the Hydro Electric radials, may only mean that he is withdrawing the Province's financial help but he does not say so.

His language would lead one to believe that he wished the municipalities to stand separately, alone and distinct, and independent of the general Provincial Hydro Electric schemes as now handled by the Commission in that regard.

As far as the Province's financial assistance is concerned, it is assistance in name only as has been proven by past experience—every municipality, in the past, has carried its own load—the only assistance that the Province has given has been that of a Provincial guarantee, and this was merely done for the purpose of enabling the municipalities to debenture to be marketed more readily.

One would think, to listen to the talk of Premier Drury, and other antagonistic opponents of the Hydro Electric schemes, that the Province had put up enormous sums of money to assist the Hydro schemes in the past; but as a

matter of fact the Province has never put up one dollar for the very reason that it did not have any dollars to put up, as it is constantly borrowing money for its own purposes having, in the past year or two borrowed millions of dollars—not for the Hydro, but to carry on its own schemes.

What the Province has done in the past has simply been to guarantee the Municipal bonds so that they could be marketed readily and converted into cash.

Up to date every municipality has been in a position to take care of its own bonds, through the profitable operation in light and power, and the operation of electric railways, where there are any in existence.

I would judge it would be very much better for the Premier and his Government to work with the Hydro Electric Commission, which is a body originally created by the Provincial Government and which has been so closely connected with the Government in all its dealings that there should be no separation; than to work in opposition to the Commission, as it seems to be Mr. Drury's idea.

Some people think that the underlying reason for Mr. Drury's opposition to the Hydro Electric radials, is due to his jealousy of Sir Adam Beck.

Premier Drury denies the charge.

Some people think that Mr. Drury wants to be the one and only autocrat and dictator in the Province of Ontario, and he fears that he may be prevented from reaching the climax of his ambition by the popularity of Sir Adam Beck, whose opponents claim is an autocratic dictator.

An unbiased man who judges of the actions of our Provincial Government since the days of Sir James Whitney can readily see that the Hydro Electric Commission was under the control of much wiser, more steadfast and more reliable men than the Government itself; because since the death of Sir James Whitney one Provincial Government, an apparently a mighty strong one, has gone down to a miserable and disgraceful defeat, through the foolishness of its own Cabinet and leader.

Another Provincial Government, the present one, is in hot water all the time and its defeat is daily predicted.

Yet, the Hydro Electric Commission goes on from one victory to another apparently stronger, stancher and more reliable than ever.

### A MAN IN POOR TROUSERS

He is without friends.  
He has lost his honor.  
He has low-flying ideals.  
He has a lowly soul.

He has lost his self.  
He has lost his education and refinement.  
He is selfish, uncharitable, or cruel.  
He has forfeited his health for wealth.  
His mind and soul have been beguiled.  
He has traded away his character for his money.  
If his wife and family do not love and respect him.  
If making money has crowded out the cultivation of his aesthetic future faculties.—The New Success Magazine.

### SOME BUSINESS EPIGRAMS

Fear is the guaranteed seed of failure.  
The majority feel right, but think wrong.  
The minds of men want not to be led, but to be awakened.  
Not what you think but what you feel drives you to your goal.  
The power to relax is the source of the power to concentrate.  
Don't worry about the other fellow. Make him worry about you.  
What keeps man small is the habit of looking for easy things. Handle the hardest job first each day. Easy ones are pleasures.  
Failure sits on the doorstep of the man who hates what he has to do.  
To be prepared for life is to be ready in two ways—against calamity and for opportunity.  
You can no more get a chance without a focus than you can get a picture without a camera.  
If you want to get attention the surest way to do it is to do something worth attention.  
Efficiency is but complete use of one's time and talent; employ your time and your talent will develop itself.—N. C. P. News.

## What God Says

### about—THE FLOWER OF THE GRASS

"As the flower of the grass he shall pass away."  
Who is he?

The rich man. "Let the rich rejoice in that he is made low, for as the flower of the grass he shall pass away." He is poor who thinks himself adequately blessed because he is rich. It is indeed a Godsend of real riches to such a man to find out by the loss of his riches how poor he has been all the while. And yet, it is appropriate to represent him, as he flourishes in his pride, as the flower of the grass, for the people are surely grass and he that makes a display among the people is surely the rich man.

But there is such a thing as being externally rich and getting out of the vegetable kingdom altogether, getting to be a son of God. Different from being a flower of the grass, isn't it? A son, yes, and an heir. Read the seventeenth verse of the eighth chapter of Romans and remember that it is God who says it.

\*Jas. 1-10.

### THE GREAT STATESMAN

When election campaigns, municipal, provincial or Dominion, are in swing, you think many times, of your first meeting with the great statesman. He is in the picture "The Fathers of Confederation" that dad was always so proud of because the great statesman sent it to him with a kindly personal note that is cherished to this day in your home. It was the more friendly that note, because although your dad was one of the most active of political workers in the country, he had always refused to be a candidate for any political office, or suggested that he be given a government position. Dad was a patriot above all things; he loved Canada passionately; he had an amazing faith in its future. To him the political party whose tenets he followed stood for all that was best for the country; its leader was a guide to follow undoubting and unquestioning.

The great statesman was to speak in Killara grove nearly three miles from your home, past which he would

little tricks for you on the way to the meeting later and made you almost forget the real guest of the day for a little while.

When mother had been introduced to the Great Statesman the turn of the children came, and because you were the youngest you shook hands with him first. There was a winning smile on the face that you have never forgotten, a bright twinkle in the eyes and a pleasing tone in the voice as he adjusted you to take pattern by Dad, and grew up to be a real Canadian like him. There was a more tender note for Mary—next to you—and a little bit of quizzical bantering for Jim, the oldest, who would have the right to vote in a year or two. "Vote straight like your dad," was one phrase you remember. But you wondered why mother flushed, and Dad smiled broadly when the Great Statesman addressed both said, "You could not deny them; they're living like—"

You sat near the Great Statesman at luncheon—it was dinner to you. And most of the time you wondered what it was that made him great. He

seemed so so, so, so much at home, so nearly like Uncle Harry, most entertaining of all your relatives. It was no trouble at all for you to follow the stories he told, little adventures of his political career mostly. You joined in the laugh he created with his tale of the meeting where many men were waiting to meet him with eggs of uncertain age and other unpleasant produce and things. While they waited impatiently he was addressing a meeting of more loyal and companionable souls elsewhere. And because he did not go to them those waiting men fell to arguing and finally to battling among themselves, with vicious fury. "And so," said he with a quiet chuckle, "the eggs were not wasted after all."

You laughed too at his story of the simple minded old lady who had been introduced to him, and who snapped out excitedly, "You don't look a bit like I'd think he'd look."

Somewhat confused the Great Statesman had asked, "Like who dear lady?"

"Like Old Nick," she answered promptly, "my brother says you're the very Old Nick himself."

That afternoon you were one of several thousands who heard him make a famous political speech. It was very disappointing at first. He stumbled and hesitated; he was feeling his way. But very soon a little story he told was followed by rippling waves of laughter, and presently the Great Statesman was speaking clearly, distinctly, easily. The crowd was listening to him now, with an earnestness that was almost voiced in the gentle winds that swayed the trees on Killara Grove. Once in a while a mighty shout interrupted him, and twice at least the shout lost itself in thunderous cheers. When he had finished amid another great outburst of applause and cheering the front ranks of the crowd surged on to the platform to shake hands with the Great Statesman. Hundreds followed and he met them all with hand grips and cheery words. But as you watched him driving away in the evening you thought he looked very tired and a little sad.

You have read that speech several times since then, understandingly, sympathetically. It always takes you back to the time you heard it and wondered what all the references to the National Policy, to free trade, reciprocity, and the Imperial connection might mean. But there was one thing, boy as you were, that you were sure you understood; you were certain that the Great Statesman, loved his country. He long ago answered a call none disobey. But his voice is still. You ran across a little thing by the late Sir Cecil Spring-Rice a few days ago, that brought back a memory of what you believed to be in the heart of the Great Statesman. It runs:—

"I give to thee, my country, all earthly things above,  
Serene, and whole, and perfect, the service of my love,  
The love that asks no questions, the love that stands the test  
That lays upon the altar the dearest and the best,  
The love that never falters, the love that pays the price,  
The love that makes unshaken the final sacrifice."

## ANNUAL MEETING OF ONTARIO FRUIT GROWERS ASSOCIATION AT TORONTO

That there will be a fruit show next  
Fall in the new Arena, Exhibition  
Park, Toronto, worthy of the best tradi-  
tions of the province, was the fore-  
cast of David Allan, Grimsby, presi-  
dent of the Ontario Fruit Growers  
Association, in opening the annual  
and largely-attended convention at  
the Prince George Hotel, Toronto, on  
Tuesday, Feb. 7. The president re-  
gretted that the Arena was not ready  
last fall for such a show, but looked  
forward with confidence to an exhibi-  
tion in 1922 that would be a credit  
to the fruit industry of Ontario. "I  
am firmly of the opinion that our in-  
dustry is holding its own during this  
unsettled time," he said, "and its  
condition compares favorably with  
any of the other great Canadian in-  
dustries. It behooves us to stand  
fast and, with optimism and industry,  
'carry on,' thus assuring the future  
greatness of the business."

The treasurer's report showed re-  
ceipts for the year, including balance  
on hand, December 31, 1920, of \$1-  
\$16.92; expenditure, \$2,194.63; balance  
on hand, \$3,222.96.

Secretary P. W. Hodgetts reviewed  
the history of the association through  
its 22 years' existence. He thought  
that the association should represent  
more fully the commercial sections.  
With this in view, he suggested  
changes in the constitution whereby:

"1. The directors should be elected  
by and from the various local and  
district associations.

"2. The membership would be  
composed of the members of such or-  
ganizations by payment of a nominal  
fee by such associations.

"3. The annual meeting should be  
devoted to such matters as legislation, trans-  
portation, grades, packages, markets,  
national advertising, provincial and  
national exhibitions, etc.

"4. District meetings should have  
the backing and co-operation of the  
provincial association and should be  
sufficient in number and location to  
cover every year the various fruit  
sections of the province.

"5. The secretary of the associa-  
tion should preferably be one outside  
of the Department of Agriculture, and  
the funds of the association should  
not be so dependent on the grant from  
the same source.

"6. If thought desirable, the Gov-  
ernment departments and experimen-  
tation could have representation on  
that board of directors."

The proposals were left to a com-  
mittee, which will report.

The history and progress of the  
Niagara Peninsula Fruit Growers As-  
sociation were reviewed by W. H.  
Bunting, St. Catharines, of the Nor-  
thumberland and Durham Apple  
Growers' Association by H. Birrell,  
Burlington, and of the Burlington Fruit

Thorough work, with plenty of mater-  
ial, applied just at the right time, as  
given in regulation spray calendars,  
was advised.

For the establishment of central  
fruit packing, Hon. Manning Doherty  
contemplates asking the Legislature  
to provide grants of 25 per cent. on  
appraised value, with a maximum of  
\$1,500 in any one case.

The announcement was made in  
the course of an address to the grow-  
ers by Mr. Doherty at the session  
on Wednesday on general agricultural  
problems.

A committee was appointed to con-  
fer with Hon. Manning Doherty, On-  
tario Minister of Agriculture, on his  
proposed aid for central packing  
houses, and with Hon. W. H. Mother-  
well, Dominion Minister of Agricul-  
ture, on the possibility of aid in erect-  
ing cold storage plants. The follow-  
ing members were named: Lieuten-  
ant-Colonel H. L. Roberts, Grimsby;  
W. F. W. Fisher, Burlington; E. F.  
Palmer, Vineland Station; J. E. John-  
son, Simcoe; A. A. Craile, St. Cathar-  
ines; and W. H. Gibson, Newcastle.

"Dusting vs Spraying" was dis-  
cussed by A. W. Ross, Vineland Sta-  
tion. Dusting was not a substitute  
for spraying, he said, but it was an  
extremely useful adjunct, especially  
in large orchards.

Mr. Ross hoped that improvements  
in dusting machinery and mixtures  
would soon make dusting as reliable  
and as economical as spraying.

A proposal to change the size of  
berry boxes, two-fifths quart, one  
pint and four-fifths quart, to one  
pint and one quart, imperial, was  
strongly opposed by the small fruit  
growers of the Chatham district. W.  
M. Fletcher, L. Pellett, W. C. Shock  
and Fred J. Watson, contended that  
such a change would mean great loss  
to the producers through the fact  
that the consumers would refuse to  
pay any more for the full quart box  
than for the present so-called quart,  
the four-fifths quart. A. A. Craile  
and W. H. Bunting, St. Catharines;  
J. E. Johnson, Simcoe; Armand  
Smith, Windsor; W. F. W. Fisher,  
Burlington; T. J. Mahony, Grimsby,  
and others, were in favor of the  
change, in view of the possibility of  
taking advantage with same of the  
United States market, where the full  
quart box was used. Dominion Fruit  
Commissioner C. W. Baxter stated  
that the matter probably would be  
decided at the Dominion Fruit Con-  
ference, to be held in Ottawa, Feb-  
ruary 22 to 24.

The question of changing grade  
names for apples in boxes was moot-  
ed. Fruit Commissioner Baxter said  
that the Canadian Fruit Trade Com-  
missioner, Liverpool, England, con-  
tended that Canadian boxes marketed  
No. 1, No. 2 and No. 3, were handi-  
capped.

with United States boxes marked, re-  
spectively, Extra Fancy, Fancy and C.  
He stated also that British Columbia  
desired the change. The matter was  
left in the hands of his association's  
representatives to the Dominion con-  
ference.

Reports were given on the organiza-  
tion and progress of the Niagara  
Peninsula Growers, Limited, by T. J.  
Mahony, the general manager, Grims-  
by; of the Niagara District Grape  
Growers, Limited, by R. J. Montgom-  
ery, St. Catharines, and of the Nor-  
folk Fruit Growers' Association, by  
J. E. Johnson, Simcoe.

Directors were elected as follows:  
B. H. Dangerfield, Kemptville; H.  
Jones, Maitland; R. W. Ireland, Wel-  
lington; A. A. Colwill, Newcastle; W.  
J. Bragg, Bowmanville; Paul A.  
Fisher, Burlington; David Allan,  
Grimsby; W. C. Nickerson, St. Cath-  
arines; W. J. Schuyler, Simcoe; John  
Clark, Forest; T. J. Salkeld, Lock-  
port; J. F. Elliott, Orford Centre; W.  
L. Hamilton, Collingwood; Prof. J.  
W. Crow, O. A. C., Guelph; E. F.  
Palmer, Vineland Station, and W. T.  
Macoun, C. E. F., Ottawa.

A resolution was passed support-  
ing a resolution of the Clarkson as-  
sociation, protesting against the pre-  
sent rate of commission charged by  
the commission merchants. Another  
called for the removal of the duty on  
miscible or miscible oils. Another  
asked the Dominion Government to  
change the regulations respecting as-  
sistance toward the establishment of  
cold storage houses, so that such may  
be available for co-operative mar-  
keting companies. The Ontario Gov-  
ernment was petitioned to establish  
in some apple-growing district a  
testing station for new varieties. The  
proposal to organize a Canadian  
Council of Horticulture was ap-  
proved.

Ontario's achievements at the Im-  
perial Fruit Show, London, were re-  
ported by W. L. Hamilton, Colling-  
wood, who accompanied the exhibit  
to England.

Medals won at the Imperial Show  
last Fall were presented to indi-  
vidual exhibitors as follows:—1st pri-  
ze for Wealthy and Wagner exhibit-  
ed by Harry Ryrie, Oakville; 2nd  
prizes for McIntosh and Snow, W. L.  
Hamilton, Collingwood; 2nd prizes  
for King and Greening, H. C. Breck-  
on, Bronte; 1st prizes for Spy and  
Newton Pippins, Chas. Chabland, Sim-  
coe; 2nd prize for Spitzenberg, Smith  
Brook, Oakville; 3rd prize for Green-  
ing, H. C. Breckon.

Directors from various parts of the  
province reported on present con-  
ditions of the fruit industry in their  
localities. W. T. Macoun, Dominion  
Horticulturist, reporting for Carlton,  
Renfrew, Lennox, Russell and Pres-  
cott, said that little apple planting  
was being done and the fruit indus-  
try generally was neglected. Three  
reasons were given:—1. Men inclined  
toward horticulture usually moved to  
more favorable districts; 2. Winter-  
killing in some winters; 3. Injury  
from mice very prevalent. R. W. Ire-  
land reported likewise for Lennox,  
Addington, Hastings and Prince Ed-  
ward.

Reporting for Northumberland,  
Durham, Peterboro and Victoria, H.  
Birrell, Brighton, stated that only  
along the lake shore were orchards  
being cared for and progressing.  
Varieties more suitable for export  
than those commonly grown should  
be introduced. In Halton and Peel,  
H. T. Foster, Burlington, stated, or-  
chards were not being neglected as  
much as elsewhere, but they were  
not as extensive as 10 years ago. St.  
Catharines, thought that apples  
should be grown more extensively in  
Lincoln. The peach industry was not  
as extensive as 20 years ago. There  
was scarcely one orchard clean of  
pests, especially of canker.

Norfolk, according to Jas. E. John-  
son, Simcoe, soon would show a  
marked development in apples, there  
being large numbers of young orch-  
ards now coming into bearing. For  
the Georgian Bay district, W. L. Ham-  
ilton reported that orchards there  
were being neglected, and there was  
no new planting.

An interesting discussion on vari-  
eties of fruits in Ontario brought out  
the fact that most varieties now  
grown were not suitable for box pack-  
ing. McIntosh, Snow and Spy were  
the only box apples, and the Spy, even  
was doubtful, being easily bruised in  
handling and difficult to grow in  
quantity to perfection. Many mem-  
bers thought that Delicious, Jonan-  
than, Winesap, Newton Pippin, Cox's  
Orange Pippin, and Rome Beauty  
might be given extensive trial.

"The Value of Spraying" was dis-  
cussed by Prof. L. Caesar, O. A. C.,  
Guelph. Irrespective of influence in  
keeping orchard pests in control,  
spraying kept the trees healthy,  
which meant better chance of fruit-  
fulness. It helped in getting annual  
crops. It ensured clean fruit. It  
was probably the most important fac-  
tor in good orchard management.  
"The practice of spraying" was dealt  
with by A. W. Ross, Vineland Station.

## ARE YOU GOING TO BUILD THIS SPRING?

Now is the time to get estimates and make arrangements  
so that work can be started immediately Spring opens up.  
Lumber and other materials are rapidly coming back to  
pre-war prices.

See me before letting your contract.

## LIBERAL CONVENTION

A Convention of the Liberals of the Provincial  
riding of Lincoln, will be held on Saturday, February  
18th, at 1.30 p.m., in the U.F.O. Hall, Smithville.  
Election of officers and selection of delegates to at-  
tend the Ontario Convention, in Toronto, will be  
some of the business. Women voters are invited to  
attend.

CAMBY WISMER,  
President.

J. A. SINCLAIR,  
Secretary.

# SPECIAL

The average man of today needs a Working Suit as  
well as a Correctly-tailored Business Suit.

In order to satisfy this need, I have laid in a limited  
stock of a cheaper grade of Suits and Overcoats, which  
will be sold at prices ranging from

\$12.50 to \$19.50

Come in and secure yours while they last.

FRED K SILL,

MAIN STREET, GRIMSBY.

(Opposite Independent Office).

Open Monday, Wednesday and Saturday Evenings

"GOOD SHOES FOR OVER SIXTY YEARS."

## SMILE PLEASE

is the photographer's stock phrase.

How often have you tried to smile while en-  
during the pain of aching, burning feet? That  
smile, if it came, was a grim one and no wonder, for  
no man can be really pleasant if his feet are clad in  
shoes which torture him at every step.

Our shoes are made on foot-form lasts and are  
truly comfortable.

Wear INVICTUS and your friends will wel-  
come your smiling countenance.

## SPORTING NEWS

## SPORT TITOLIAL

### BEACH BOYS BOUNCE BEANS-VILLE

The unexpected sometimes happens and it happened Thursday night when the Beach team which has been coached by "Puss" Burdette scored a victory over the Beamsville boys. During the first round "Dave" Hunter's squad played the Beamsville team right off their feet. "Ken" Poole the budding young centre ice player tallying two goals. The Beach team displayed great team work throughout the entire game.

The second period opened briskly. Beamsville playing real hard to overcome the lead. Stone finally managed to slip one by Hermiston who played his first game with the Beach for the season. Hermiston in goal has strengthened the Hunters considerably. The second period ended 3-1 in favor of the Beach.

The last period was a little rough but there were few penalties. Both teams while playing hard kept the game fairly clean. Keir was put off during this period and while he was off McNinch made a brilliant rush, taking away from the rest of the players scoring the final tally, the game ending 4-1, Beachites game.

Line up:—  
Beamsville Goal Beach  
Gibson Defense Hermiston  
Shepherd Defense McNinch  
Mathewson Wings Keir  
Garbutt Centre Fleur  
Stone Centre Marsh  
Telford Subs. Poole  
Stone, "Dob" Durham  
McArthur, R. Morningstar Bros.  
Referee—Earl Allan.

### SMITHVILLE CONTINUE THEIR WINNING STREAK

Smithville continued her winning streak on Monday night when she handed the Grimsby East boys a lemon. The Cosbyites and the Hunterites each scored in the first. "Ken" Poole waltzing right through the entire Smithville team to tally for the easterners.

In the second period Smithville registered twice, bringing the score to 3-1. Up until the end of the second round no penalties were awarded and the game was clean, but during the third part things became much rougher. Poole scored from a pass of Keir in the last period, but Smithville quickly followed suit. Gracey, their centre ice man, scoring by a long shot. This was the last goal of the game. Keir was penalized during this period for a dirty trip. It looks as though Smithville is going to be amongst those present in the finals.

Line up:—  
Smithville Goal Beach  
Ellis Defense Hermiston  
Hoffman Defense Keir  
Allan Wing McNinch  
Jenkins Wing Marsh  
Gracey, J. Centre Fleur  
Allan, A. Subs. Poole  
Gracey, H. Subs. Durham  
Morningstar Morningstar  
Referee—McBride.

### HERE'S THE PROOF OF WHAT ICE WILL DO

Evidently Warton can only see their famous (P) Redmen. The Warton Echo says that not one member of the Markdale team could catch a place on the Warton line-up if they wanted to. We make the statement unreservedly, that Warton cannot tell a real hockey player when it sees one. Farrell of the Markdale line-up can play better hockey than any man that ever played for Warton. Dad Ashley is a good hockey player, granted, but for hockey strategy and generalship Farrell has it over much touted Ashley like a tent.

The Farrell mentioned in the above item is none other than our own "Dad" who learned the game in the old VanDyke rink. He is a son of H. H. and Mrs. Farrell and a brother of Roy of the Peach Kings; "Bo" of the Little Peaches "Bill" of the Pili Pounders; Horace of the Red Devils and "Doug" of the Rink Rats. Guess that's all of them. If we have missed any, let's know.

### Standings

Monday, March 6:  
Beamsville at Grimsby  
Mountain at Smithville

The value of Canada's manufactured products has increased almost two-fold within four years. In 1915 the value was \$1,118,694,000; in 1920 the value was \$1,946,618,000.

In 1915 the life insurance written and paid for in Canada amounted to \$217,000,000. At that time the total insurance in force in Canada amounted to \$1,242,000,000.

Apples produced in Canada in 1921 and turned to commercial use amounted to 2,404,240 barrels, having a total value of \$39,350,000, an increase of more than five million dollars over the production of the preceding year.

### Young McNinch who will meet Irish Kennedy in Hamilton to-morrow night is well known here. He went to camp this summer with "B" Co. 80th. Regiment and while at Niagara did considerable boxing winning the camp honours in his class.

There will be a boxing tourney held in Grimsby some time in the near future. Pans had better keep their eyes open for an announcement.

St. Andrews College Midgets, defeated Lake Lodge to the tune of three two on Saturday morning at the local rink. The game was very even, the teams being well matched. Each team scored in the first and second periods.

The S. A. C. boys managed however to prevent the Lake Lodge sextet scoring after they made their winning goal in the third round.

Ed. Walker who played for the Metal Craft last year made his debut for this season when he played with the Mountaineers against the Pili Pounders.

Who said "Doc" Alexander couldn't play hockey? "Doc" is becoming better every game, and was a real factor for the Pili Pounders on Monday night.

Tom Warners Rink Rats defeated Fruitland 7-0 on Saturday morning. They are now looking for more victims.

Vance who plays defense for Smithville was unable to play Monday night owing to injuries received while playing a game last week.

The Smithville-Pili Pounders game was late getting started Thursday night owing to the snow, which caused the mountain to be so slippery that it was necessary for the Smithville Snake Changers to leave their cars up on top of the hill and "hoof" it down to the Arena.

If "Pop" Shepherd lives to be ninety he will probably die playing hockey or baseball. You got to hand it to "pop," he has it.

Many fans of the good old game are not aware that Lou Marsh the well-known referee and sporting writer of the Toronto Star cannot hear their roars and shouts of "put him off, kill the referee," etc. Lou always plugs his ears with cotton before starting a game. This enables him to think clearly in spite of the noise. He would need a ball of it if he was working in the L.C.H.L.

Grimsby Arena is about the busiest spot in forty counties these days. So much so that the caretakers of the ice palace, Tom Warner and "Shorty" Metcalfe, have become the sleepless wonders. Every day is a busy day at this popular amusement place, but on Saturday all records were broken. For thirteen straight hours the ice service was occupied. Hockey games of all kinds and descriptions were on the time table during the morning and afternoon and in the evening there was skating. Several games in the juvenile league were played.

St. Andrews College, of Toronto, defeated Lake Lodge School in a game 2-1. The Rink Rats and Fruitland staged a thrilling contest and the McNab team in the Niagara District League came all the way from below St. Catharines to get an hour's practice workout. Great advertising boys!

It looks as though the aim of the L.C.H.L. will be accomplished for it is evident that new hockey players are rapidly being developed. Next year the Junior and Intermediate teams will have a group of candidates to select from that should produce for Grimsby a team that will put this town right on the hockey map. Poole who plays centre for the Beach, "Bob" Stone, the Beamsville youngster, Ross, Smithville's left wing and Marsh who holds down the right wing for Dave Hunter's squad are all eligible for Junior O.H.A. "Wally" Fisher the versatile Pili Pounders goal guardian, and Ellis who plays the same part for Smithville are giving great exhibitions in goal. There are several other players who will be good material for next year.

The crowds that are following the L.C.H.L. are growing constantly. It reminds one of the proverbial snowball rolling down hill, the further it rolls the larger it gets. So with the hockey fans, for during the last three nights the turnout has doubled.

Great Excitement prevails at Grimsby East over the remarkable showing that the eastern boys are making in the Lincoln County Hockey League. Everybody down in that section is getting all "hot up" over the brand of playing and some great arguments, led by Jay Hook, Mayor of Grimsby East, take place daily around the cracker barrel in Eyres' store.

Smithville citizens are not supporting their team in the hockey league in a manner that they should. This team is improving all the time and are playing a good brand of hockey but are receiving little or no support from their home town. Wake up Smithville and give your boys a boost. They are doing their best to put you on the sporting map and deserve your support.

### "Puss" Burdette certainly has the Beach boys playing the little old combination. The league is still young and it is too early to predict but the Grimsby East team will bear careful watching.

Dave Hunter is deserving of great credit along with coach "Puss" Burdette for the kind of a hockey team they have placed on the "frozen water" in Archie Dixon's league. Everybody around this district always looked upon Dave as a hard-headed, solid business man with no time or inclination for sport. But Dave has fooled them. Information from the snow-bound county of Glenagarry, from whence Dave came, is to the effect that in his frivolis days when he was only a young cattle herder in that section and before he became a Peach King in the Grimsby section, he was a fair kind of a hockey player. Now he is a full-fledged manager. Dave started out four weeks ago to round up a team of hockey players. He did not want a team of old-timers but rather was looking for youngsters that he could train and bring on to fill up the ranks of the Grimsby O.H.A. teams in future years. He is on the right track and making a fair fist of the job. He grabbed off a sifty pair of old-time defense players in McNinch and Keir and then brought Hermiston out of retirement and put him in the nets. There was the backbone of his team. He then rounded up four or five young lads from fifteen to twenty that could skate like birds but knew as much about stick handling and the rules of the game as a Pili Islander knows about fur coats. He then elicited the aid of Burdette and the two of them went to work. They have done wonders with those kids. They have taught them how to body check, stick check, stick handle and above all they are drilling combination and team play into them constantly and moreover the orders are STAY ON THE ICE, let the other fellow do the dirty work. This team are comers and there are no two ways from a jacket about it. Oh yes, Dave also has a team of juveniles under his wing that are being properly and carefully trained and while they may not go far in the juvenile series this year they are being given the right kind of ground work to make them real hockey players in the winters to come.

"Rube" McNinch is playing hockey again and turning in a nice nest

Every body talks but on the Grimsby East side, "Rube" is only another case of ability and cleanness being allowed to go to waste through the lack of proper facilities for the training of our young manhood along athletic lines. Some few years ago when this boy, and many other lads of his age, were in their "teens" Grimsby suddenly found itself without a rink. "Rube" and a lot of the other "kids" showed a lot of ability as hockey players, but never had a chance as they grew older to develop. Now after twelve or more years "Rube" comes back and shows that had he had a chance that he would have been a hockey player of no mean ability. He is not alone. There are dozens of boys in this district who are in the same boat. Beamsville had the same trouble. They always had good boys in Beamsville but were never sure of having a rink. It seems a shame that the young lads of Canada should be deprived of developing their talents along athletic lines just because proper ball fields and proper rinks are not provided for the purpose. There should be a law on the books of the Dominion compelling every town and village to provide a proper up-to-date athletic field and a hockey rink. In the cities they should be provided according to population. If a law of this kind were in existence Canada in a few years would have the finest developed race of people in the world.

"BILL" DAWE IN TROUBLE

Ever since the Arena opened Bill Dawe has been hurling challenges on behalf of the Winona Broomball team, to everyone he has met. "Broomball for fun, money or marbles" has been Bill's slogan, but he said it just once too often—Jim Walker and Dave Hunter, representing the Beach team, took up Bill's offer and the argument will be settled Friday night, at 7.30. Somebody will pay for an oyster supper for the two teams, so the fans will see some desperate broomball. The teams will line up:

Winona—W. C. Dawe, J. P. Bridgeman, Major A. A. Smith, Hugh Campbell, A. E. Durley, J. Puddicombe, G. Carpenter, J. Hodgson.

Beach—J. Walker, D. Hunter, J. Hunter, H. K. Griffith, H. H. Ponton, A. Poole, A. Campbell, Jay Book, W. Coon.

Immediately after the broomball game Ernie Bell's juniors will hook-up with the Vineland team making a big night's sport at popular prices of 25c and 15c plus tax.

HILLIER WINS DESPITE SPRAIN WRIST

Beamsville, Feb. 12—Albert Hillier, Canadian champion heavy-weight amateur boxer, and winner of second place in the amateur championship boxing tourney of America, arrived home from New York on Saturday morning. Hillier is the proud possessor of a fine gold watch and fob, the token he won on Thursday night at Madison Square Garden before ten thousand fans. Hillier to start was weighed in at 204 pounds to Hillier's 163. The big American was filled with the puzzle with swank. He amused himself by continually trying

### MOTOR MOTTOES

An ounce of attention is worth a pound of overhaul.  
An oiling a day keeps the repair man away.  
Look before you back.  
Spare the oil and spoil the car.  
A rolling car gathers no crowd.  
A tool in the kit is worth thousands in the garage.  
Service is a service does.  
Pools rush in where experts fear to ride.  
A little knowledge of electrical systems is a dangerous thing.  
An ounce of instruction may save a pound of repair.  
A skid to the wise is sufficient.

When it was announced to the crowd that the Canadian boy had won out against his burly opponent with one arm in action only, he was loudly cheered. It was his sprained wrist that prevented Hillier going into the finals.

Phone 36 for O.K.B. Stationery

### TO CROSS NIAGARA ON TIGHT ROPE

Mrs. Eleanor, the 17-year-old English girl who is thrilling audiences by her high tight rope act at the Crystal Palace Circus, London, is to attempt Blondin's famous feat of walking across Niagara Falls on a tight rope. Negotiations have already been entered into and the attempt will likely take place next June.

### FIRST CARNIVAL A BRILLIANT AFFAIR

Those that were so unfortunate as to miss being at the Arena Carnival on Friday night, missed one of the best times that they ever can hope to enjoy. The large skating surface was crowded with skaters clad in multicolored uniforms and costumes. All the old time masquerade friends were there: Indians, cowboys, gypsy queen, Charlie Chaplin, tramps and colored folks galore.

There were two hundred and eighty-nine persons in costume and about eight hundred spectators. The judging commenced at eight-thirty, the first event being for boys and girls under fifteen. Miss Kathleen Hodge as Miss Erin, won the first prize and Miss Frances Burgoyne, a Gypsy girl, was a close second.

Mrs. Richardson won the best lady's costume prize, in a Gypsy costume. Miss McKane, as Minnehaha, was second.

Mr. Maycock, Vinemount, and Mr. Fred Sill, received the first and second prizes in the best gentleman's disguise. Mr. Maycock being a courtier, and Mr. Sill a humble Chinese laundry-man, whose vocabulary was limited to "no ticks, no washee."

Miss E. Dorety and Reeve Theal were the winners of the most original costume. Miss Dorety being a charming jockey and the worthy Reeve, an Irishman of the old school.

The judges, Mr. Reid, of Beamsville; Mr. Daw, of Winona, and Mr. Cosby, of Smithville, had a tremendous task in trying to choose the prize winners. There were so many really remarkable costumes, that it was only after a great deal of deliberation that they were able to make selections. They are to be congratulated in their choice. Many people are still wondering who the Gold Medal Flour girls were. Miss Gertrude Ross and Miss Mills are the ladies and they certainly deserved a prize.

After the judging was over, those that came unmasked were allowed to join the skaters. The band was in attendance and rendered music that made poor skaters skate, and good skaters enter the seventh heaven of delight.

### WILL WORD ADOPT YEARLY CALENDAR?

After 1927, the year is to be divided into thirteen months of twenty-eight days each, with each name-day always falling on the same date, if the plan of Mr. Moses C. Cotsworth, F.G.S., a world-famous statistician of Vancouver, B.C., is adopted. For over twenty-seven years Mr. Cotsworth has been at work perfecting his "Yearal" calendar, which is designed to do away with the present confusing system of dividing the year into twelve months of unequal lengths. The new calendar is expected to receive the endorsement of the international conference of astronomers which meets in Rome next April immediately after an important conference of Catholic Church dignitaries, which is also expected to approve of the change.

Leading scientific societies the world over have already given unqualified approval to the proposal. The "Yearal" calendar was endorsed by the Dominion of Canada in 1912 and was under consideration by the British Imperial authorities when the war broke out, making impossible an international conference which was to have been held in 1914. The original plan had been to have the calendar in current use by 1917, but naturally this was impossible owing to chaotic conditions.

With thirteen months in the year every week will begin with a Sunday and every month will end with a Saturday. Every Saturday will be a seventh, fourteenth, twenty-first or twenty-eighth; every Sunday a first, eighth, fifteenth, of twenty-second, and so on with the other days forever.

Holidays will invariably fall on the same definite dates. Christmas and New Year's will always be on a Saturday. Easter will cease to be a movable feast, subject to a seven-weeks' fluctuation due to lunar variations. All church festivals and national holidays will similarly be definitely allotted to a certain day forever.

Every month will have four Saturdays. The advantage of this will at once be apparent to business men and workers alike, for it will greatly tend to simplify bookkeeping and expenditure.

If the new calendar is adopted, every month in the year will have the days on these dates, forever:

Sun.	Mon.	Tu.	Wed.	Th.	Fri.	Sat.
1	2	3	4	5	6	7
8	9	10	11	12	13	14
15	16	17	18	19	20	21
22	23	24	25	26	27	28

THE NEW POPE PIUS, XI  
Cardinal Ratti, Archbishop of Milan, who was elected Pope on the seventh ballot of the Sacred College. He was only created a Cardinal last June and is in his 63rd year.

Grimsby Branch. A. C. Turner, Manager.

## THE PILOT "SUCCESS"

PIPELESS FURNACE

When buying a heating system, the thing to consider is what it IS and will DO, rather than its original COST. In buying a small priced furnace, you usually "save at the spigot and lose at the bung hole"—the after costs many times more than eat up your primary saving. Before either deciding on or placing your order for any furnace, you will conserve your own best interests by according me an opportunity to explain this matter to you and show wherein the "SUCCESS" excels and why it is the BEST and MOST ECONOMICAL. IT will save cash for you from its installation to its finish and wears for many years with exceedingly low cost for upkeep. THE BEST IS CHEAPEST in the end.

Sole agent in your locality.
